I wanted to upgrade my graphics card to the next level of gaming experience, and I was thinking of getting Geforce 6800 Ultra, but recently I've seen some reviews and benchmarks of comparisons including both ATI Radeon X800XT and Geforce6800 Ultra, and they both seem to be a little different in different aspects and to get to my point, give me your ideas about both graphics cards, and one more thing, which of the graphics card would performe better in C&C RENEGADE!

Thank You For Your Comments!
