kfcSuperMidgetOf course.. as long as you remember your username+pass. You can access your account on any computer if I'm not mistaken.

No.

If the cd key isnt correct on the system the user is logging into, no matter what the password, the login wont work. Passwords in Renegades are not like steam ids. You can create a million logins with one cd key, yet without the cd key, they are worthless.

Incorrect, I have had around 5 Renegades and installed them on different computer,s, my login works with all.

I know for a fact that you have an account for WOL, not for your serial for Renegade.
