On 3/1/05 I will be in this computer program calld PC Genius. It is so great. I have spent the last eight years working with computers non-stop. This class is going to teach me everything I need to know for the following:

3D Modeling

FPS editing

How to "CREATE" a basic program like noteped.

These are just a few of the hundreds of things I will be learning. I encourage people to get into something like this if you are interested into computers like me. I am not even paying a cent. How? My dads freind hooked me up with the works. I get to work with a Alien Ware computer!!! For those of you dont know, Alien Ware computers are the best gaming computers in the whole freekin world! Wish me luck in this new class. When im done with this class in two years, i will be planning to make a somewhat useful program for renegade. Don't know what it is yet but it will be worth it in the end. Wish me luck!
