Are you on crack or what?

You know that 1000MB = 1GB right?

Cool.

512MB (comenly known as "half a gig of ram")

512+512=1024MB

1024MB - 1000MB = 24MB

Sooooooooo 1.000GB + 24MB = 1024MB or 1.024GB (One gig + 24MB)

You guys are the stupidest fuckin pieces of white trash that I have seen. You have crappy computers, don't know what computers you have. All you know is that you are 1337 and that your computer is kick ass. STFU and go think about what computer hardware to ask your mommy for Christmas.

And btw icedog90, YES you are a n00b for not knowing what internal sound card you have.
