Sorry, I think you're on crack.

You barely even read my post, I said it was impossible to tell what my sound card is, GET THAT?  
I SAID IT IS IMPOSSIBLE TO TELL WHAT MY SOUND CARD IS.

I SAID IT IS IMPOSSIBLE TO TELL WHAT MY SOUND CARD IS.

I SAID IT IS IMPOSSIBLE TO TELL WHAT MY SOUND CARD IS.

I SAID IT IS IMPOSSIBLE TO TELL WHAT MY SOUND CARD IS.

Lay off the crack, please.

Also, search Google, because it is true that:

1024MB = 1GB.

1024MB = 1GB.

1024MB = 1GB.

1024MB = 1GB.

Just like how:

1024KB = 1MB.

1024KB = 1MB.

1024KB = 1MB.

Thank you, and good bye.

kfcBTW I find it funny that icedog90 has made a determination regarding your vide card without even knowing exactly what you have. For christ sakes, there's at least 6 different variations in the Geforce 4 line.

All Geforce 4 64mb cards today are now crappy.
