I've got a problem with my ethernet in that sometimes it drops out for a short period. I'm able to stay connected to the Renegade server that I'm playing on... but after a while, I get kicked. I'm going to assume that it's because Renguard loses connection to its master server, and thus the server-side Renguard sees that I'm no longer on the Renguard network, and kicks me.

Is there any way to make Renguard reconnect or perhaps reconnect faster?
