Subject: Renguard with 64bit windows
Posted by FMhalo on Fri, 25 Feb 2005 03:18:55 GMT

Well there is no reason why it shouldnt work... All 32 bit applications are compatible with the windows x64 edition as long as your processor supports it (which mine does). I'm guessing there might be some 16 bit code somewhere =/

Anyways i can always test it, i'm basically screwed without renguard because i wouldnt be able to play renegade because all my favorite servers are running half renguard. I usually get !forcerg FMhalo quite often =/
