256kbits DSL? Would suck me....

I have the absolutely Minimum System for Renegade when I think of the CPU-eating extras brought by vloknboky & BHS . Don't come over 20 FPS on Fanmaps Ultra-AOW....

AthlonXP 2200+ (Thoroughbred) 133Mhz FSB

Kingston DDR 400 (though the Board supports only 266) RAM 1GB

ASUS video card with NVIDIA GeForce FX5700 chip (not LE!) 256MB VideoRAM

Samsung Spinpoint blabla 55GB (formatted) 7200 RPM HDD

Optical mouse with Speedpad

Onboard LAN , Router and DSL with 3,5Mbits down and 192Kbits up

With a P4 @2,8Ghz I would buy a 6600GT or higher...

Msgtpain, this is only a internal Windows limit. Use Partition Magic and you can use FAT32 on a 500GB Maxtor IE.....
