This is hilarious...this guy says that RenGuard has a virus, and it does at least the following:

some n00b

Virus Contains:

Mouse Controll

Renegade Auto Shutoff

Disables clock

Winamp functions fry

TeamSpeak disablers

and I'm still lookin it up..... There's possibly more....

Just thought I'd let you guys know..

I got into Renguard own system and found a SystemINI374.Inx file that contained all I said

Found another part of it..

Screenshot disabler..

This guy's smart.... Doesn't want anyone finding out what it does.... Damnit... Now I have to have a system scan and find where this screenshot.INXE (E is Expansion) is.

Erm.... I dunno what this is.. but this (Another INXE) file says it's a Renegade/Renguard Homing Protocall... What the fuck?

I foudn the last thing in the virus..

All it is, is a simple tracking device I have to encode to track who ever did this. Whiiich won't be easy...

LOL!
