---

I got the same as Jarhead, tried it 6 times, every time with setting the reg value to 0...

everything seems to work fine until i get this (ss)..

then i close that window, and it says cp1 download complete... but it's not..

when i try the CP1small from zunnie, it ruins my renegade, so thats no option..

ill try to rename scriptsx.dll to scripts.dll and see if it works then...

hm this seems to work.. i joined a NR server (A0000007N, buddie 24 players) and it said im running cp1.. didnt do that before.. also renegade hasnt crashed yet (1 minute) normally it would have crashed..

hm, ill try this - and ill post again if it crashes wish me good luck lol
