AaronxptekAaronhey ohn! its Aaronjp82   You are right these guys at BHS are awesome!

The stupid Aaron from IPS? The same IPS that promised Invision Board would always be free?

nope that is not me lol you mean AaronIIPS. I run IPB Helpers not IPS. And for the record they never said it would always be free.

"Yes, we're pushing our paid services harder, but we're still offering a free product that is fully functional. This has always been our vision and it's not going to change. "They" said 1.1 wouldn't be free, it was. "They" said 1.2 wouldn't be free, it was. "They" said 1.3 wouldn't be free, it was. "They" say 2.0 won't be free - and it will be." -Matt Mecham
