You can, though. Just go to your westwood/renegeade folder and double click on game2.exe. It will start up renegeade without having to lead renegeade. You can also uninstall it. Go to add/remove programs and remove renegeade. Don't worry if the file size says it's about 1GB big. That's just a bug. It won't uninstall renegeade, just renegeade.
