Try a clean install of brenbot 1.41 and CP1.3
http://download.renguard.com/SS-CP1.3.exe

Possibly you dont have the right scripts.dll / scripts2.dll / bhs.dll on your
server. Also lookup some reference about the server2.ini file and make sure
you set "Enable_Gamelog = 1"
On irc you will have to "!set gamelog on" as well.
