
Subject: I'm Not Running RenGuard, WTF?!

If you loaded up Renegade w/ RG before loading up Renegade (and connecting to WOL) before running RG, you're not connected to the RG network, as RG doesn't know who to look for until after this is done.

(This, as of v1.3, needs to be done every time you change your nick.)

If you haven't already, closing both Renegade and RG, and loading back up should fix the problem. You just need to make sure it says, "Welcome <your nick here>" in the RG status window before loading up Renegade, and you should be fine.
