3dsmax is a fully functional and complete 3d modeling program.

Gmax has like 75% of the functionality, and is quite incomplete compared to what 3dsmax has...

Gmax was basicly stripped down for amatuer modders for games.

I look at it this way: Gmax is the retarded son of 3dsmax, It's alot like it's father, but his functionality is alot lower and his mind is very incomplete.
