---

ok I am getting sick of the noobs that think everyone who is half way decent cheat and ban. Could someone please tell me where I can get a good ini file for the ren dedicated to destroy air strip and weapons factory. Also could someone help me put renguard on my box.

I am using a 2.4 pent 1 gig ram on a 10 meg line that we use as a battlefield server. Ren dedicated is already loaded and ready to go just need to make the minor changes I am requesting.

This server should hold between 64 and 100 players on this game.
