flyingfoxThis method works more often than not, and is VERY FUN! Forget about the people whining "boohoo it's a waste of mines" because it isn't, it's an absolutely brilliant use for them.

Also if there's no risk that the enemy'll sneak in to your base, you can even buy an APC, throw loads of proxy C4 on the front then go ram into some enemy vehicle/person. kaboom!

pps, here's a video I made a long time ago that showcases the fun in this. sorry there's no sound http://homepage.ntlworld.com/k.livingston/suicidebomber.avi Indeed!! i did this in a server(it was mesa ,i belive..),got a gren,and so did AlkovRox(EatMyCar7),and a hottie put proxy C4 on us. the PP was down in the Nod base,and just the ob was left. we rushed the ob,killed the techy inside cause one of us 'bumped' him. and we blew the MCT. game over,GDI wins.
