We never created the 4,000 ton flying toaster oven, nor did the human mind devise it. The flying toaster oven is, was, and will be. kthx. Our flying toaster oven is your flying toaster oven whether or not you realize it or choose to believe it, it's true.

All I meant to illustrate by that is what you offered isn't a very complete explanation. It all reverts back to my original quandary of why we can question the validity of Greek Gods, but not the Christian God so openly and readily.
