You didnt update Renegade to version 1.037 then.

I know 100% sure because this "entry

point?Detect_Bandwith@@YAKKKHAAHAAKKPAUtBandtestSettingsStruct@@PAD>@Z could not be located in the dynamic link libray Bandtest.dll."

error only happens when you have not updated your game prior to installing RenGuard.

Do this:

- Uninstall RenGuard
 - Uninstall Renegade
 - Delete the Renegade folder through windows explorer
 - Install Renegade
 - Update Renegade to v.1037
 - English: v1.037 Update
 - Other Language?: Check for additional Languages
 - Install RenGuard
 - Install Core Patch 1 through RenGuard when asked
-
