Ok well I have to admit,Even when it dose present a problem at times i still think having Renguard and running it on the servers has been a great add on to the game.I can remmber when i first started to play renegade and started out with running a server, it always seemed i was spending more time just kicking people and not enjoying the game we all have come to play! So as far as Renguard is concernd Great Job Guys!! and thank you for allowing me and my friends who love to play fair, the chance to be able to do so!
