RenxGo to the console and type status. Find the cheater, get steamID, ban.

I thought you could only change names once per round anyway, so it shouldn't be that hard.

I'm assuming you're using the mani admin mod too. If that's the case the admin menu isn't the only way to use its commands. Go into the console and type ma_help.

Yeah ok I'll try doing that.

Also I can't believe how a topic like this can go to shit so fast....... :rolleyes:
