Oblivion165IRON FARTDJMGetting another CD key is simple, go into C: Drive and press ctrl + a, then backspace then enter.

This is a folder created by westwood to stop gamers using false serials, delete all the folders on the C: Drive and any serial (even 0000-0000000-000000) you enter in the installation will work. I tried it...Now what?
Renegade doesn't seem to work right. Did I do something wrong? Help me please.

Lmao that thing DJM siad isnt a methode to fix the serial.....

Anyway, it maybe the server because me and nick can play on other servers, but not on each others.

You can solve this problem by getting a new CD key.
