JPNOD Always use your pistol when there's a engine trying to disarm it.

You'll kill the engine, then probably another, usually these newbs won't know what hit them. When there's a hotwire you can use the pistol as well but it's kinda harder because he will probably move. Unless you're good with the pistol you better switch to laser. When there's a lot of hotties, always laser. Very good point, but I only use the laser if there's a vehicle covering it. Reason: pistol headshot is exactly the same damage as laser headshot (except for a few armor points of burn damage.... which is nothing compared to the 50 points per headshot), compare the nearly silent pistol which draws no attention to yourself, to the loud-as-hell laser rifle with the red beams. Whenever anyone hears the SBH rifle they think, fuck, SBH and rush to deal with it, but pistol you can take down one or more engines before they even know you're there.

The only downside is the reload, really
