Aircraftkiller a.k.a. ACKI have all sorts of neat things in the source Max format. Original Nod Apache, Tiberium Harvesters, Medium Tank, the only CTF level, the only DM level, Noddingham, multiplayer Helipads...

But they're useless (except for boasting about having them) as long you're keeping them only to yourself.

And remember to release them as they are, not tampering with them in any way (eg. removing parts of a file or saving them in another format).
