Okay, now I need something to do with my website. Flaming won't help.

Since no places I know would ever rent a PC game, I need some help writing the PC reviews for my site. Now, since console games are fairly easy because of their vast availability and rentability (I know it's not a word), I don't need help with this, I'll get my other friends to help. But, I know that a lot of people here play PC games, and a couple of reviews would be nice. Criteria, anyone?

[list]

[*]Rating out of 5

[*]Try and make it longer

[*]Screenshots, anyone?

[*]Please send it in a .doc, .rtf, or whatever, I'll be the one to make it HTML.

[*]This is not a giant flame game war, it's a review, but you can put your opinion in too

[/list:u]

Thanks, if you help. No thanks to the members that will spam the thread saying how they won't help.
