I was wondering if someone could make me two cool signatures, one with my username, Williewill, and one with the username, Semsa. I would like them both to be the same (save for the username) and have both include the phrase, "Shoot first... make new friends later!" on it. If possible, I would like some animation like zooming in on it with a sniper rifle... If it isn't too much trouble I would like Master Chief from Halo on it with some blue. Thanks in advance...
