Subject: Level Edit Error
Posted by Titan1x77 on Sat, 26 Mar 2005 22:14:09 GMT

midget you figure this out yet?

Im having this same problem with the latest drivers and the with 9.0c

Mine use to work, but something went wrong about 4 months ago with the level settings

EDIT....problem solved for me....just check "disable visual themes" in it's compatability propertys

you can still run it under windows XP and leave the advanced text services unchecked.
