DJMSorry to say, and no offense but I don't like any of them.

The text is WAY too big and the font is horrible.

Try a different font, smaller and blend the image's edges better.

Also remember, simplicity is sometimes the best way.

Yeah I agree about not bein' too "busy", but I must get all the members of the band in or they won't be happy...otherwise, I would do something like the second pic below. Is the first one any better w/ smaller font? Or is it still not simple enough?
