cowmisfitl hope your happy Tool, you have successfully supported the murder by starvation of an innocent disabled woman in the United States of America.

You do indeed refuse to read my opinion on the matter, don't you?

You've made no attempt to address it.

You obviously have made no conscious thought about what I'm saying

And I'm the mindless "tool"

Michael Schiavo has succesfully proven in front of 28 courts in a row that Terri Schiavo is braindead. The movies the media shows time and again of Terri having random, spasmodic muscle twitches are by no means a sign of whether or not she is thinking any more. Her brain lacks both the capacity to see and hear.

It was a sad event when Terri Schiavo died 15 years ago. But the past is the past, and it's long past time to move on.
