---

Because we have a p.c with multiple users, i want to put renegade in a shared folder so that i will be able to access it through my own username instead of using the admin everytime i want to play renegade which is a lot. i tried to do this but unsuccessfully so i had to uninstall and reinstall. i am now having problems with westwood patches every time i try and play online. i can't play on westwood because it's says "new version/patch is available". and it asks "would you like to download now? yes or no?". if i click yes it downloads it and i try to log in but it says again "new version/patch is available". if i click no it quits the screen and i have to start ver again.

Any help, and i will be thankfull.
