Oblivion165AircraftkillerAlthough I'm obviously not an expert on web design, I can tell you for certain that these forums are one of the worst places you can go for advice on what you make.

because of you....

Never thought i would see the day when

Deadfive > Aircraftkiller

EDIT: ok nvm no one is less than deadfive

No, it's because most of you are idiots and don't know anything more than how to whine about people that you don't like while making hypocritical statements over and over...

That's why this place sucks for actual criticism, because if you compare any of your half-ass comments to a real artistic critique you'd see what I'm talking about. Then again you're an idiot too so I'm not putting much faith in you getting what I'm talking about.
