glyde51Busy is good, he'd want the people to look at it and go "Wow, these designers look talented."
No, too busy hurts your eyes. You can't concentrate on the content, and too much on the design can actually give you a headache. I just don't like how gbull has it laid out. It needs to be cleaner. That metallic 3D look is quite annoying. The rest isn't bad, but he needs to tone the site down. Also, make the site brighter. Having it 90% black doesn't do much for me.
