You see that wreck on on a few levels not just one, the first time you see it is on the 3rd level of the GDI campaign, where you first get airstrikes (once you take out all the sams). It is just on the cliff to the left of your base.

Another one is on one of the 3 possible last mission maps for GDI, its the one where you start off next to a NOD comm. centre and powerplant. The wreck is on a cliff near the nearest nod base towards the left. There are turrets near that wreck.
