A few words come to mind, "thief", "n00b", "idiot".

You call yourself a map maker, and yet you show off crap like that as if it was the best thing to ever come to Renegade! The map has poor texturing, out-of-place snow mounds, horrible FPS, and plenty more flaws. 8 AI bots shouldn't cause that big of a FPS drop. Let's not forget the fact that it is a total rip-off of Glacier Flying. :rolleyes:

Nice job, oh great map maker. Be sure to tell us when 1000's of people download this poor excuse of a map.
