I'm sure there are ppl getting around renguard, I mean it was out for what close to a year nowQuote:RenGuard 1.03 released!

Fri May 14, 2004 10:58 amThe longer a program is out without major updated the greater the chance some one hacked/cracked it. And hundreds of cheaters had 11 months to find ways to get around it.

The actual bypass is not something that anyone can be done just by anyone, you need a significant amount of coding/decompiling/cracking experience to do it, which not a lot of ppl have.

I am really waiting for the next renguard release, which from the specs sounds a hell of a lot more secure then the current one.

I say stop the work on all other projects and focus on RenGuard 1.4
