Quote:Game Channel.....
Failed To Create Game Channel....

It's failing because there is some one in your WOL server join screen. They try to join but the join button isn't active they wait a lil and leave b4 or right after they leave someone else joins the server join screen and this goes on and on and on(your server can't create a game channel because it still has ppl in it trying to join) until no one tries to join the server channel for 1 full minute, at which time WOL times out the channel and drops it. Now your server can connect and create a new channel for itself.

Edit: you know what it maybe that when the WOL pings your server Channel (every 1.5mins) if no one is there and server isn't on, the room is droped.
