These are the Imperial Electrobinoculars. They provide their user with a telescopic view of the battlefield - very useful for reconaissance and scouting. They can be purchased by any Imperial player, and also come free with the Imperial Scout Trooper. Thanks to a script by Jonathan Wilson, the Imperial Electrobinoculars have their own "scope texture" separate from that of sniper rifles and Rebel Electrobinoculars.[The Rebels will have Electrobinoculars of their own]. This model was created by Exdeath and textured by Prometheus.
