When you install Renguard for the first time, Game.exe version 1.037 MUST be 4.20 MB (4,414,276 bytes).

If this is correct, you must check to see if there is a game2.exe, if there is, get rid!

If you already have a game2.exe to which is 4.20 MB, re-name it to game.exe

Run the Renguard installation again, which should rename game.exe to game2.exe
Renguard will then name itself to game.exe

it should then look like:

Simply launch the Renegade shortcut on the desktop, and you're off!
