Quote:On infantry only maps or maps where the TB field is commonly rushed by a large number of vehicles and/or infantry to attack your base through a tunnel or narrow canyon, minning the harvester can be a very good thing. Trust me on this... There is no better way to tick off rushers on Egypt than to mine the harvester... Especially if you rub it in by saying things like "The harvester of death strikes again" or "The death harvy has found its mark!".

One word pretty much sums this one up...wow...
