Try reinstalling Renegade instead, backup any skins/maps you have, then delete whole WESTWOOD\RENEGADE folder.

Install Renegade again, try a different directory, like C:\Renegade, also reinstall westwood internet components.

When done, update your game (by going to westwood online ingame), add your maps/skins and stuff back. Now login by using your nickname and pass and SAVE that nickname.

Reboot your PC and try and see if Renguard works now. Good luck.
