jschultz9$cop3 and conydynalic or whatever your name is...I suck at rene...then lets just set up a game..n00bstation admins against your clans. Just for the fun of it. It always seems like everytime someone gets kicked from any server they always say its a mod on a power trip. Learn not to act retarded with your stupid little clans that dont mean shit. Then maybe you people could actually accomplish something in life other then proving you are retarded. For teh person who claims no one plays on the n00bstation server...stop in there...actually dont....but those of us that are there know what goes on there. We have a good server and we do very well without people like you and your gay little clans. If it wasnt for public servers there wouldnt be no Renegade for you stupid little clans for you people to join. So basically all the clans that whine and bitch need to stay outta the public servers..

yap.. u know our forum, post there
