Worse than that, you'll never find a Refinery that has nothing inside it. Even the Tiberian Dawn Refinery had an interior inside one of the videos, and it's extremely detailed with loads of pipes and grates everywhere.

This is just completely barren and shows no resemblance to a Refinery whatsoever. Also, why are you rendering this shit in 3D Studio when you can put it into Rendegade's engine?

Remember, it's Nod, not NOD.
