General HavocMadtone hasn't been around that last 2 days, wonder where he is. I bet he will return with about 20 new models to spam on the Mod Exchange for us. Anyway hope he returns soon.

If you're using Outlook then a spam filter normally works. Blocking HTML email reduced 95% of all my spam in my inbox, now I only get the messages I need and the rest is nearly always junk.

So what if someone needs to send you an e-mail that contains HTML in it? Like / lists or <a> links or <h1> headers, etc.?
