Aircraftkiller You haven't played very much, and you have a really low standard.

Gameplay value ACK, if the vote were for eye candy, I certainly would have voted for Tropics.

Tropics looks amazing especially with all the settings to the max. I just find it lacks the fun gameplay of other maps such as Niagra.

Your standards differ from mine because you come with a different mindset. The mindset of a map maker, who knows how to make the map and the hard work involved.

Please don't dis-credit me with your comments. I may not have played as long as you but it's pretty darn close.
