Actually, ive been playing Renegade for about two years now, and i havent locked the camera to the turret, because the "V" key is the same thing. Albeit, i sometimes accidentally let the "V" key go, and it resets to the front of the vehicle (A pain in the ass if im shooting backwards, like in Artillery) but i still like it the way it is... Actually, the more that i think about it, ive gotten killed atleast 20 times because i let go of the "V" key, so ill be locking the camera next time im on Renegade.
