Not sure if anyone has had this, if its been reported before I apologise, but if nobody ever speaks for fear of sound repetitive then nothing ever gets said.

Ok, on our server, the bot has started to report that a building has been killed twice simultaneously, and then the player gets rec'd for killing 2 buildings even though he has killed 1 building. So I'm wondering if this is a known problem, or if its new, and either way is there a way to fix it ?
