YSLMuffinsAircraftkillerOpera loads that website without any problems.

What version do you have? It doesn't load properly in mine. There should be much more to that page... It doesn't look like in that screenshot anyway it loaded properly...

Okay, bump?

Anyways, the RenAlert site doesn't load properly in the newest Opera, which I downloaded to test my own site on.

Firefox it's screwed up too.

Internet Explorer, perfect.

You should fix that HTML on the buttons. In Firefox they have borders, and in Opera the tables are messed.
