Why? It says do not click. It's your fault if you clicked it... :rolleyes:

z310It didn't crash my computer.

Mine didn't crash either. All I did was disable the internet for a brief second, then did a close group.

But, I don't want to hear your mindless bitching about how it fucked up your computer and the occasional "Reborn Sucks!"

Remember, it's j4s[p], not j4sp.
