Hmm i should look in this section of the forum more often, i didn't even notice this poll...

Anyways, Deth_River and Tropics are both good maps, however tropics does often end up with camping. Nod can even camp from the center on a small spot.

I think all maps that will be added with CP's should be updated and given a different name (CP or BHS in it or something) so people can't "cross connect" or whatever you wanna call it.

There are some other great maps in there other then those two, like Bio or Woodland for example. Even though Bio is a little small it has some nice gameplay.

One i still like a lot is Conquest_Winter but to bad too few people think that to add it it in the poll.
