Subject: why does my computer crash ?
Posted by simo_2 on Sat, 19 Apr 2003 20:08:43 GMT

Hello,
    i have recently being trying to install c&c renegade, but; it goes as far as the introduction movie the my computer stays as a blank, black screen, with no activity what so ever, the only way to get out of the black screen is to restart my computer.

    please, i would be so grateful if somebody could resolve my problem!
                        simon

p.s. please tell me if you require my computer specs.
